EGGER COMPACT LAMINATE – DESIGN-ORIENTED, VERSATILE AND DURABLE

EGGER compact laminates with a black or coloured core are the ideal material for upscale furniture and interior design. They perfectly match EGGER decors and textures. Fabricators benefit from the possibilities of smooth processing and the durability of the components. End customers are convinced by the visually appealing, resilient and easy to clean surfaces. By request, EGGER compact laminates are also available in a low flammability version: Flammex Euroclass B (according to DIN EN 13501-1).

CHARACTERISTICS

- Visually appealing and elegant
- Robust and durable
- Resilient and easy-care surface
- No subsequent edge or surface finishing required
- Homogenous material for precise processing

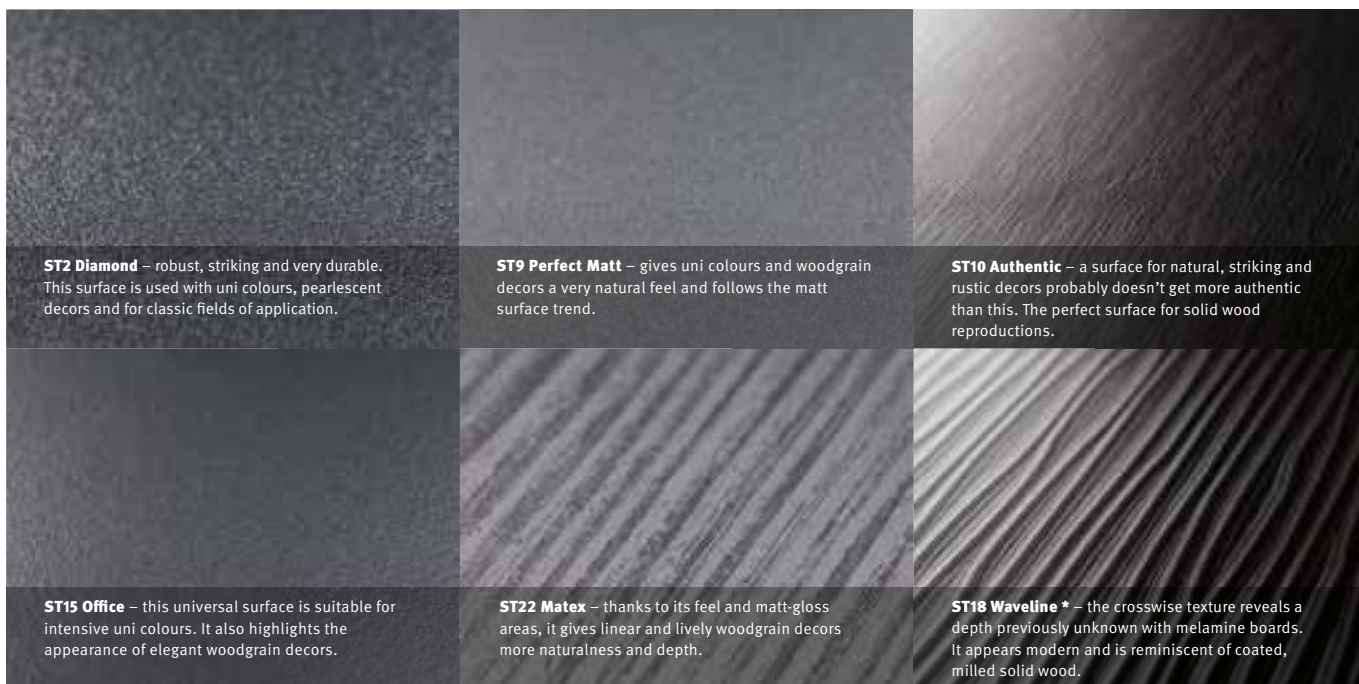

APPLICATIONS

Thanks to its durability and robustness, compact laminates are ideal for interior applications subject to high stress or with increased requirements for cleanliness and hygiene: tables, work surfaces, wall panelling, partition walls and applications in moisture-prone areas.

DECORS AND TEXTURES

Compact laminates are a design experience, and not only because of the intensive black or coloured core. The EGGER decor and texture match is unique for this material: Allow yourself to be inspired by visiting www.egger.com/zoom.

* From 8 mm board thickness and texture applied on both sides

The surface, and therefore the tactile experience of decors, has become just as important as the appearance.

COMPACT LAMINATE COMPOSITION

- 1** Overlay (double sided)
- 2** Impregnated decorative papers
- 3** Impregnated phenolic resin core papers
- 4** Impregnated decorative papers
